Role

Centro Cardiologico Monzino (IEO Group) of Milan is a **Research Institute of Public Interest** for cardiovascular diseases; the most innovative professional, scientific and technological contributions are the basis of excellence applied to the care of patients.

The Institute is seat, besides the Cardiovascular Science Department of the **Università degli Studi of Milan**, of Degree Course in Medicine and Surgery, of Schools of Specialization in Cardiology and Cardiac Surgery and of the Special School for Techniques in Cardiocirculatory Physiology.

Research and Practice

The Institute is dedicated to the cardiovascular scientific research, the clinical research is integrated with the basic one.

Experimental research is conducted in **2** laboratories, Cellular Biology and Biochemistry of Atherotrombosis and Vascular Biology and Gene Therapy; there are more than **118** ongoing research projects (**112** paper – **466,97** IF – **25** trials).

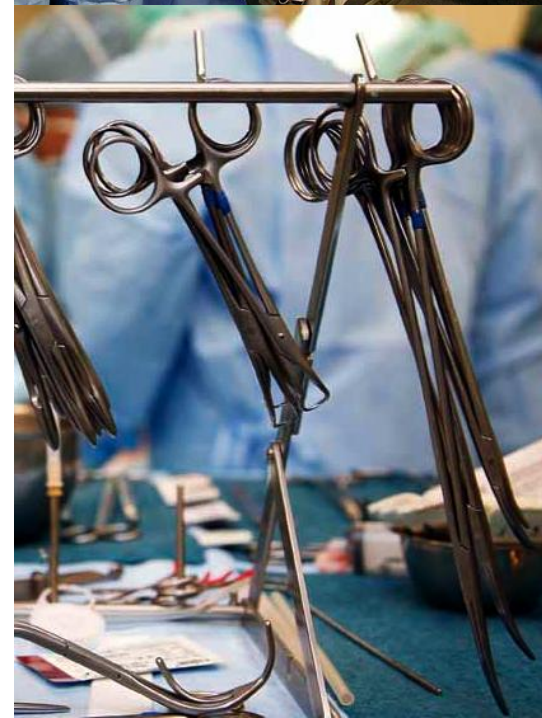

Last year CCM performed: **8.129** admissions, **3.905** haemodynamic procedures and **2.104** PTCA, **2.108** electrophysiology procedures, **1.545** cardiac & vascular surgery interventions, **8.980** ER admissions, **110.000** outpatient consultations and diagnostic checks.

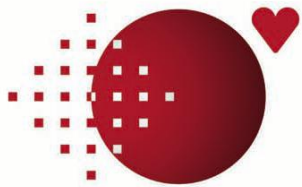

Diagnosis and Therapy

The most innovative diagnostic and therapeutic routes concerning pathologies of the cardiocirculatory system are usually personalized and guaranteed at CCM by means of:

201 accredited beds, **22** of them belonging to Intensive Care Unit, **3** Haemodynamic Rooms, **2** Electrophysiology Rooms, **4** Surgery Rooms (including Multifunctional Room), Diagnostic Services (including tridimensional Echography and 64 slices CAT), the Cardiovascular Rehabilitation Unit, **23** specialistic outpatients wards, **Milano City** Outpatients Center, Telecardiology, ER with Chest Pain Unit and admissions to angioplasty primary treatment in the acute phase of infarction, **24** hours a day, **365** days a year.

Research for care
