Training course

Objective

This basic training course is a theoretical and practical course focused to medical doctors and radiographer who wish to start this new imaging modality in cardiology without previous experience in this field. The tutoring is organized in different groups of lessons covering technical and clinical aspects of cardiovascular magnetic resonance followed by real time reconstruction of clinical cases related to the lessons discussed in the room. The visitors will reach autonomy in the acquisition, processing, interpretation and reporting of cardiac magnetic resonance exam.

Recipients of the courser

The course is intended for cardiologists, radiologists, nuclear physicians and specialists in general medicine.
